Thanks Nancy! I read her book before I knew that this "Dusty society" existed..The book was really interesting ! 🤔

I remember that one chapter was about the "Dusty fans"(Nancy, Carole etc)...

At that time I had no idea that I was going to meet "the fans" in this virtual Dusty world and maybe meet them IRL in the future too! 🤝

Hey Nancy, you don't miss anything Dusty-related, do you!

Thanks for posting. Beating the drum for Dusty, as always. In January I will be teaching a graduate seminar at New York University called "Transatlantic Pop in the 1960s: New Critical Perspectives." No need to tell this crowd that Miss Dusty will feature

prominently!

Liz, thanks for asking about my blood count. Yes, it's ok, though it's still an effort to eat meat as often as I should. More liver recipes please!

Looking forward to Dusty Day--volcanoes permitting!

Annie

Now there's a sentence you don't hear every day.

They broke the mold on Annie.
