Do we know if Dusty had any hobbies?...either before or after she was famous?

I would imagine she collected records, possibly repaired crockery with superglue, and watched Hollywood movies.

Hey Brian,

You forgot map reading, clothes/shoes and shopping in general, watching CNN til all hours, talking on phone to friends, watching football(she followed Brazil), also Wimbledon, cat box cleaning and as per the lady herself on the Dame Edna show-- allowing cats to sit on her face 🐱 Quite a busy person actually.

Connie

I believe Dusty also enjoyed geography and history-travelling/flying must have been high on the agenda too

Dusty was a US Civil War buff.

Just a few more - eating out, driving cars VERY FAST, caring for all animals especially cats large and small. I wonder what she would have made of Sat Navs, probably, like me, not a lot, nothing like a good road map!

Given all the horrendous problems with those systems I think with a Sat Nav Dusty would have been the first person to drive off the edge of England 😊 ..at eighty miles an hour.

😊 Yes, the records ! And probably first the records.

Remember her telling of hearing the "Exciters" *Tell Him* outside a record shop on the streets of New York ?

And it was tearing herself away from her precious record collection that took her so long to leave L.A. 😊

she used to like watching the planes at Heathrow.

making clothes for Einstein too. 😊
