I like your pic Terri! I suppose the fountain is on the other side, isn't it?

I think from now on, everyone who lives in NY, or visits, has to go to the fountain for a picture 🤔

I'm curious to know why it's not a fountain anymore ?

Look to see: the basin is gone. In it's place appears to be a plaque. And the turtle's head is different, the mouth is closed. Also it's legs are shortened.

Perhaps maintaining such a fountain is no longer in the NYC parks budget.

The proximity of the buildings behind Dusty are not oriented in perspective to Terri's current photo.

I suspect it's in the same general location, but some park remodeling would account for it being moved.

Is there a street address for this figure's location ?
