  Has anyone else seen that there is a re-release of DUSTY IN MEMPHIS. It is a two LP release, recorded at 45 rpm and for sale in USA by Acoustic Sounds. Catalogue number AAPP821445. The price is \$50 + SHIPPING ,( via Edexcel), but I would assume that import tax would also have to be paid. The site shows the album cover which is a straight copy of the original USA cover. Has anyone bought it???

It's been on eBay several times in the past 6 months a lot cheaper - less than \$10 US sometimes.

I wish they would re-release this album with the tracks Dusty recorded to - remember that they completely wiped the string and horn arrangements she had agreed to and when she heard the final album she went ballistic. That's one of the reasons she never fully embraced this album - it was such a betrayal and the one thing she feared when relinquishing control of her recordings - that someone would mess with her music.

Maggie

I wonder if those masters still exist or if they were lost in the Atlantic fire of 1978?

Or maybe just thrown out or erased because they never intended to use them - hard to say.

The powers-that-be at Atlantic seemed to express great reverence for Dusty's talent even years after the Memphis sessions and their infamous tensions, so hopefully they wouldn't have wiped or trashed those precious reels!

 Those tapes (should they exist) are in a pickle.

 Jerry Wexler, Ahmet Ertegun, Tom Dowd, and Arif Marden are all dead. Jeff Barry, and Gamble n' Huff are still kickin', but my guess is that a house full of attorneys represent their beneficiaries, and control over any remaining recordings.
