Silly stuff. on a recent trip to Montreal I wandered into HMV and found a book called "Sleeveface Be The Vinyl", a collection of photos of real people with album covers over their faces...

Check this one out, this is not the photo in the book. The book published in 2008 has Dusty's Ooowwweee cover photo.

Also, while checking out a coffee table book on Elton John, the famous pic of Dusty and Elton taken in LA circa 1972 was used and the photo credit said "Elton and Bette Midle at an LA party.." Huh? Nothing like checking and verifying facts! Shame!
